

LARGE & XL TREE

SET UP INSTRUCTIONS

NOTE: During shipping the Tree chains can disconnect or occasionally break. Simply reconnect or replace chain with provided spares (9.) pictured below.

CEILING MOUNTED TREE ASSEMBLY

Step 1. Remove protective plastic wrap from the top and bottom of each tree ring. *For "Pearl" white trees skip this step.*

Step 2. Screw drywall anchor (8.) into ceiling centered above tree location. The anchor supports up to 40lbs while the tree only weights 15lbs fully decorated.

Step 3. Screw tree hook (1.) into drywall anchor.

Step 4. Attach coupler (4.) to one end of the longer thick ball chain (5.)

Step 5. Attach chain to the ceiling hook and cut excess to the desired length. Desired length should place the bottom tree ring about 1 foot from the floor. *See Appendix for Standing Tree Sputnik instructions or next page for Ceiling Mounted Tree Sputnik instructions.*

Step 6. Once chain (5.) is cut to desired length, attach the second coupler (4.) to the end of the ceiling chain.

Step 7. Unscrew the tree bolt (7.) and re-screw through the tree center (10.) center hole to form the hanging assembly. *See next page for visual.*

Step 8. Attach top of hanging assembly to ceiling chain.

Step 9. Attach shorter thick ball chain (6.) to bottom hook of the Hanging Assembly. *See next page for visual.*

Step 10. Hook the top of the mirror ball rotator to the bottom chain (6.) attached to the hanging assembly. *See next page for visual.*

Step 11. Attach the mirror ball to the mirror ball rotating device underneath the tree.

Step 7

Steps 8, 9, 10

Steps 8, 9, 10 (with Sputnik*)

If you purchased an undecorated tree, the mirror ball with rotator can be purchased separately. The Tree Stand and Sputnik Topper can be purchased separately on our website as well.
